

WEBSITE REDESIGN & DEVELOPMENT PROPOSAL

Prepared By

Leandro Keene Manalon
Web Developer & Digital Solutions Provider

Executive Summary

This proposal outlines a complete website redesign and development project aimed at enhancing your company's digital presence, improving customer engagement, and creating a more effective platform for generating inquiries and business opportunities.

The proposed solution focuses on modern design, improved functionality, mobile responsiveness, search engine optimization, and enhanced user experience to ensure your website effectively represents your brand and supports your business goals.

Project Objectives

The primary objectives of this project are:

- Modernize the overall website appearance and user experience.
 - Improve website performance and usability.
 - Repair or rebuild non-functioning website features where applicable.
 - Enhance mobile responsiveness across all devices.
 - Improve service and product presentation.
 - Strengthen search engine visibility through SEO best practices.
 - Increase customer inquiries and lead generation opportunities.
 - Provide a scalable platform for future business growth.
-

Website Assessment and Planning

During the Website Assessment and Planning phase, we will evaluate the current website structure, functionality, user experience, and overall performance to identify opportunities for enhancement, optimization, and modernization.

Website Design & Visual Appeal

The website's visual design and layout should align with current web standards, industry best practices, and user expectations to establish credibility, trust, and a professional brand image.

Search Functionality

The website search functionality should provide visitors with a fast and efficient way to locate products, services, and relevant information.

Navigation & User Experience

Website navigation should be intuitive and structured to help visitors quickly access services, products, and company information.

Mobile Responsiveness

The website should deliver a seamless and consistent browsing experience across desktop, tablet, and mobile devices.

Search Engine Optimization (SEO)

The website structure, content, and technical implementation should support improved visibility on search engines and strengthen long-term organic growth opportunities.

Performance & Accessibility

Website speed, accessibility, and overall performance should be optimized to improve user satisfaction and engagement.

Proposed Solution

We propose a complete redesign and redevelopment of your company website.

Website Design & User Experience

- Modern and professional website design
- Improved visual hierarchy
- Professional branding integration
- Enhanced user experience

Client-Provided Services

If the client currently owns and manages their domain name and web hosting services, the website will be developed and deployed using the existing hosting environment and domain.

The client will provide all necessary website access credentials, hosting access, domain management access, content, images, and other required assets for project completion.

Optional Additional Services

Should the client require hosting, domain management, SSL certificates, website maintenance, or other related services, these will be quoted separately based on the selected package and requirements.

Estimated Annual Costs

Service	Estimated Cost
Domain Renewal	USD \$14 – \$42/year

Service	Estimated Cost
Web Hosting	USD \$50 – \$250/year
Premium SSL Certificate	USD \$33 – \$164/year

Actual pricing may vary depending on the selected provider and package.

Warranty & Support

A complimentary thirty (30) day support period will be provided following website launch.

This support includes:

- Bug fixes related to development
- Technical assistance
- Minor corrections
- Website guidance and support

Requests for new features, enhancements, or additional functionality beyond the agreed scope may be quoted separately.

Acceptance

Upon approval of this proposal, project scheduling and onboarding will begin immediately following receipt of the required down payment.

We appreciate the opportunity to work with your company and look forward to helping strengthen your online presence through a modern, professional, and results-driven website.
